It's The Old Motto:

"The Most of the Best for the Least" at
THE PEOPLE'S STORE

EVERY business should have a reserve account into which a certain portion of the profits are regularly to create a fund available for development or emergency. The farmer's herd of cattle is his reserve fund and should be continually growing. If you need a loan, see us.

Investments and Profits

Almost anyone would consider an investment that pays an annual profit of 20 per cent, an extraordinary and highly desirable. Such an investment first on the market for sale would be picked up quickly at a price considerably above par.

People who know tell us that an investment should yield more than 20 per cent in three to five years, thus paying a return of 20 to 30 per cent. Every farmer has thousands of dollars invested in his property that require protection from the weather. By investing a small sum in a stock he can protect the life of the investments and thus make a good profit on his investment.
